

**LED flasher**

Flasher | LED | 6 LEDs | 12-24V | amber

Our ST LED flashers grew very quickly from launch to a real success. The sleek design and high light output combined with the many flash patterns and color choices make that you can choose a suitable version for every application. This version with 6 LEDs is very flat which gives you the possibility to give a powerful flash signal even when space is limited. Thanks to the aluminium housing, which you screw or bolt, heat is effectively diverted, which specifically enhances the lifespan and also guarantees high light output. The plastic lens is UV and shockproof. This model with 6 LEDs is also available in 4 colors and 5 dual color versions. The CISPR certification makes carefree use possible when high demands are placed on EMC. Be sure to check out the versions with 3 and 12 LEDs and combine them on your vehicles to achieve uniform and extremely powerful signage.

**Specifications**

<b>Color</b>	Amber
<b>Operating voltage</b>	12-24V
<b>Mounting</b>	Surface mount
<b>Operation temperature</b>	-30° C / +65° C
<b>Ligth source</b>	LED
<b>Number of LEDs</b>	6
<b>Length of cable meter</b>	0,21
<b>Current draw 12V Amp</b>	0.6 Amp
<b>Current draw 24V Amp</b>	0.3 Amp
<b>Colour of lens</b>	Clear
<b>Synchronisable</b>	Yes
