Driving light Long-range high beam headlamp | round | Amber LED ring

For many years, the SIM halogen long beam light has been a fixed value on many trucks throughout Europe. In order to meet your demand for a long beam light with amber position light this new version with LED was developed.

By combining a halogen H1 light source with an amber LED light spiral to create a beautiful touch of amber, we were able to cut costs considerably.

As a result you are now totally along with the latest tendency and this at a very attractive price level.

Amber LED ring
